

- 1 - α rim band: $|\Gamma| = \sqrt{1 - \alpha} \approx 0.99634 \rightarrow 1$
- core: $\Gamma = (\sqrt{S} - 1)/(\sqrt{S} + 1)$, $0 \rightarrow -1$ (canonical)
- J (junction-side bias): $-1/3 \rightarrow -1$ [UNDERIVED side-assignment]
- B (bond-side bias): $-1/3 \rightarrow +1$, matched at $A = \sqrt{15}/4$ [UNDERIVED side-assignment]

- $-1/3$ bare $z = 3$ vertex (counting fact)
- core
- J (junction-side bias)
- B (bond-side bias)
